

About me

Specialized in the **MERN stack** (MongoDB, Express, React, and Node.js), highly focused on **best practices**, **clean code**, and **Agile** ecosystems. I never miss the opportunity to explore and use technologies and tools that prioritize achieving an **optimal user experience** above all. And how did I get here? After completing my biology degree and specializing in fish and aquariums, I joined a **startup**, an environment in which I grew immensely both personally and professionally, **reaching goals far from my comfort zone**. All of this fueled my desire to take on what has been my **greatest and most satisfying challenge: programming**.

Education

📅 02/2023 – 06/2023

FULL-STACK WEB DEVELOPMENT
ISDI Coders

📅 09/2012 – 07/2019

Bachelor's Degree in Biology & MSc in Aquaculture
Universidad Santiago de Compostela

Experience in WEB DEVELOPMENT

📅 05/2023 – Present

Frontend & Backend
BRETARO

BRETARO is a **Single Page Application** developed with **React-Redux Toolkit**, **Express.js** and **Node.js**, enabling users to manage a collection of books. It provides a simple and efficient way to perform **CRUD** operations.

📅 11/2023 – Present

Frontend
TICKET-IN

Ticket-In is a **Single Page Application** developed with **TypeScript** and **React-Redux Toolkit** to facilitate the purchase of movie tickets, focused on an optimal user experience.

Other work experiences

📅 11/2021 – 04/2023

Aquarist
Aquarium Barcelona & Aquadec Aquariums

📅 12/2018 – 11/2021

Aquaponics operations & Communication
Green in Blue (before Aquapioneers)

Accomplishments: Brand Identity and Community Building
I successfully created the **brand identity** and product from scratch, enabling Green in Blue to establish a strong presence on **social media**. This effort has allowed the company to build a prominent aquaponics **community** in Catalonia and Spain, gaining remarkable international recognition within the **sustainability** ecosystem.
